

Universal CRM & Customer Management System

Proposal & Scope Document

Prepared By: Upparac Technology

Project Overview

The Universal CRM & Customer Management System is a modern, lightweight, and user-friendly business management solution designed to help organizations capture enquiries, manage customers, track follow-ups, assign work, and maintain complete customer history from a single dashboard. The system is designed for small and medium businesses that receive enquiries from multiple sources such as WhatsApp, Email, Justdial, IndiaMART, Website Forms, Social Media, Referrals, and Manual Entries. The primary goal is to reduce manual work, eliminate duplicate records, improve team collaboration, and increase customer response efficiency.

Project Cost

Development Cost: ₹25,000

Development Timeline: 10–20 Working Days

Technology Stack

- PHP
 - MySQL
 - Bootstrap/Tailwind
 - JavaScript
 - OCR Integration
 - Responsive Web Application
-

Module 1 : Secure Login Features

- Secure Login
 - Forgot Password
 - Change Password
 - User Profile
 - Role Based Access
 - Session Management
-

Module 2 : Dashboard

Business Overview Dashboard Widgets

- New Enquiries
- Open Requirements
- Today's Follow-ups
- Pending Tasks
- Closed Requirements
- Recent Customers
- Recent Activities
- Lead Source Statistics
- Employee Performance

Quick Actions

- Import Enquiry
 - Add Customer
 - Add Requirement
 - Schedule Follow-up
 - Create Task
-

Module 3 : Universal Enquiry Import

The system allows importing enquiries from multiple sources.

Supported Sources

- Screenshot
- Image
- PDF
- Copy & Paste Text
- Email Content
- WhatsApp Screenshot

Workflow

Upload ↓ OCR (If Required) ↓ Editable Form ↓ Review ↓ Save

Benefits

- Faster Data Entry
 - Less Manual Typing
 - Easy Editing Before Save
-

Module 4 : Customer Management

Maintain complete customer information.

Customer Information

- Name
- Company Name
- Mobile Number
- Alternate Number
- Email
- GST Number
- Address
- City

- State
- Country
- Notes

Customer Dashboard

- Total Requirements
 - Open Requirements
 - Closed Requirements
 - Last Activity
 - Assigned Employee
-

Module 5 : Smart Duplicate Detection

The system automatically checks

- Mobile Number
- Email Address
- GST Number
- Name + Company

If an existing customer is found

Options

- Merge with Existing Customer
 - Create New Customer
 - View Existing Customer
-

Module 6 : Multiple Requirement Management

One customer can have multiple enquiries or requirements.

Example: ABC Industries

└─ CCTV Installation

└─ Attendance System

└ Website Development

└ Mobile Application

Each requirement has its own

- Status
 - Priority
 - Notes
 - Attachments
 - Timeline
 - Follow-ups
 - Assigned Employee
-

Module 7 : Requirement Status

Available Status

- New
- Contacted
- In Progress
- Follow-up
- Meeting Scheduled
- Waiting
- Completed
- Closed
- Cancelled

Priority

- High
 - Medium
 - Low
-

Module 8 : Timeline

Every action performed inside the system is automatically recorded.

Examples

- Enquiry Imported
- Customer Created
- Requirement Added
- Employee Assigned
- Status Updated
- Note Added
- Attachment Uploaded
- Follow-up Scheduled
- Requirement Closed

This provides complete activity history.

Module 9 : Notes

Unlimited Notes

Supports

- Text Notes
- Internal Notes
- Important Notes
- Pinned Notes

Notes remain attached to the customer and requirement.

Module 10 : Attachments

Upload and manage

- Images
- PDF Files
- Documents
- Screenshots
- Voice Notes

Each attachment remains linked to the respective customer or requirement.

Module 11 : Follow-up Management

Schedule customer follow-ups.

Features

- Follow-up Date
- Follow-up Time
- Reminder Notes
- Assigned Employee
- Status

Follow-up Status

- Pending
- Completed
- Missed
- Rescheduled

Dashboard automatically displays today's follow-ups.

Module 12 : Task Management

Assign internal work.

Task Information

- Task Title
- Description

- Assigned Employee
- Priority
- Due Date
- Status

Task Status

- Pending
 - In Progress
 - Completed
 - Cancelled
-

Module 13 : Calendar

Calendar View Displays

- Follow-ups
- Meetings
- Tasks
- Due Dates

Views

- Daily
 - Weekly
 - Monthly
-

Module 14 : Communication Shortcuts

Quick Actions

- Call Customer
- WhatsApp Customer
- Send Email

Communication History

- Date
 - Employee
 - Remarks
-

Module 15 : Global Search

Instant search throughout the system.

Search By

- Customer Name
 - Mobile Number
 - Company
 - Email
 - Requirement
 - Employee
 - Tags
-

Module 16 : Reports

Business Reports

- Customer Report
- Requirement Report
- Employee Report
- Follow-up Report
- Lead Source Report
- Activity Report

Export

- Excel
- PDF
- CSV

Module 17 : Employee Management

Manage employees and permissions.

Roles

- Admin
- Manager
- Sales
- Support

Permissions

- View
 - Create
 - Edit
 - Delete
 - Assign
-

Module 18 : Notifications

System Notifications

- New Enquiry
 - Follow-up Reminder
 - Task Reminder
 - Requirement Assigned
 - Status Updated
-

Module 19 : Tags

Categorize data.

Examples

- Hot Lead
- VIP Customer
- Repeat Customer
- Justdial
- Website
- Email
- WhatsApp
- Urgent

Tags simplify searching and filtering.

Module 20 : Customer 360°

Every customer has a complete profile.

Includes

- Personal Information
- Contact Details
- Requirement List
- Timeline
- Notes
- Attachments
- Follow-ups
- Tasks
- Communication History

Everything is available from one screen.

Module 21 : Settings

Business Settings

- Company Details
 - Company Logo
 - Theme
 - User Management
 - Status Management
 - Priority Management
 - Tags
 - Notification Preferences
-

Module 22 : Audit Log

Every important action is recorded.

Includes

- User
 - Action
 - Date & Time
 - Previous Value
 - Updated Value
-

OCR-Based Enquiry Import (Highlight Feature)

The system includes an OCR-based enquiry import feature.

Users can simply:

- Upload a screenshot
- Upload an image
- Paste copied text

The system extracts the available information and presents it in an editable form before saving. This significantly reduces manual data entry and improves productivity.

Complete Workflow

Receive Enquiry ↓ Import Enquiry ↓ OCR / Manual Entry ↓ Review Details ↓ Duplicate Check ↓ Create or Merge Customer ↓ Add Requirement ↓ Assign Employee ↓ Schedule Follow-up ↓ Add Notes & Attachments ↓ Track Progress ↓ Complete Requirement

Future Upgrade Options

The following features can be added later as separate modules.

- WhatsApp API Integration
 - Email Synchronization
 - Website Lead Integration
 - Excel Bulk Import
 - Business Card Scanner
 - Mobile Application
 - Customer Portal
 - AI-based Auto Classification
 - Inventory Management
 - Billing & Invoicing
 - Payment Tracking
-

Benefits

- Faster enquiry management
- No duplicate customers
- Centralized customer database
- Improved follow-up tracking
- Better team collaboration
- Complete customer history

- Easy search and reporting
 - Mobile responsive interface
 - Simple and user-friendly design
 - Suitable for almost every business
-

Deliverables

- ✓ Complete Web Application
 - ✓ Responsive UI
 - ✓ Database Setup
 - ✓ User Authentication
 - ✓ Admin Panel
 - ✓ Source Code
 - ✓ Installation Support
 - ✓ Basic Training
-

Commercial Terms

Payment Terms

- 50% Advance
- 50% On Final Deployment

Warranty

- 30 Days Bug Fix Support

Annual Maintenance (Optional)

₹1,500/month
